Printed in Great Britain

Contents of Volume 91

Number 1, 7 July 1981

FEDYANIN, V. K. and YAKUSHEVICH, L. V., The Exciton Spectrum of the Alpha-helical Protein Molecule Model 1

YOCKEY, H. P., Self Organization Origin of Life Scenarios and Information Theory 13

MCGAVIN, S., Some Formal Consequences of a Specific Association Between Double Stranded Nucleic Acid Molecules—Properties of Multistranded Structures 33

LEVIN, G. V. and STRAAT, P. A., Antarctic Soil No. 726 and Implications for the Viking Labeled Release Experiment . . 41

CRAIG, A. G., A Proposed Modification to the Microdosimetric Theory of RBE 47

NEAL, J. V. and POTTEN, C. S., A Critical Assessment of the Intestinal Proliferon Hypothesis 63

DE WACHTER, R., The Number of Repeats Expected in Random Nucleic Acid Sequences and Found in Genes 71

RUBINOV, S. I., SEGEL, L. A. and EBEL, W., A Mathematical Framework for the Study of Morphogenetic Development in the Slime Mold 99

CHARTON, M., Protein Folding and the Genetic Code: An Alternative Quantitative Model 115

PARNAS, H. and SEGEL, L. A., A Theoretical Study of Calcium Entry in Nerve Terminals, with Application to Neurotransmitter Release 125

SHEARS, S. B., The Mitochondrial Protonic Electrochemical Potential Difference as a Point of Hormone Action. II. New Proposals for the Activity of Glucagon 171

SEGER, J., Kinship and Covariance 191

NICHOL, L. W., SCULLEY, M. J., JEFFREY, P. D. and TEASDALE, R. D., Cross-linking Interactions in Systems of Three Reactants: Theory Pertaining to Their Experimental Elucidation . . 215

ROBINSON, C. E., The Molecule-group Schema of Memory Storage . 231

LETTERS TO THE EDITOR

BARTOSZ, G., Non-Specific Reactions: Molecular Basis for Ageing 233

GUION, R. R., Possible Interactions Between Alkoxy Amphetamines and Brain Serotonin Receptors . . 237

Number 2, 21 July 1981

ZACIU, C., Microscopical Significance of the Critical Characteristics of Stimuli in Excitation Processes, as Revealed by Spectral Analysis . 241

FULDA, J. S., The Logistic Equation and Population Decline . . 255

KLOTZ, L. C. and BLANKEN, R. L., A Practical Method for Calculating Evolutionary Trees from Sequence Data 261

WAXMAN, A. M., A Continuum Approach to Blood Vessel Growth: Axisymmetric Elastic Structures 273

KRISHNAN, L., KRISHNAN, E. C. and JEWELL, W. R., Energy Kinetics and Role of Nutrition in Cancer Patients 303

HAFNER, D., BORCHARD, U., RICHTER, O. and NEUGEBAUER, M., Parameter Estimation in Hodgkin–Huxley-Type Equations for Membrane Action Potentials in Nerve and Heart Muscle . . 321

KUBOTA, Y., TAKAHASHI, S., NISHIKAWA, K. and OOI, T., Homology in Protein Sequences Expressed by Correlation Coefficients . 347

SOBERON, J. M. and MARTINEZ DEL RIO, C., The Dynamics of a Plant–Pollinator Interaction 363

LETTERS TO THE EDITOR

SMITH, T. F. and WATERMAN, M. S., Overlapping Genes and Information Theory 379

YOCKEY, H. P., Rebuttal of "Overlapping Genes and Information Theory" 381

Number 3, 7 August 1981

OLSON, W. H. and CUMMING, R. B., Chemical Mutagens: Dosimetry, Haber's Rule and Linear Systems 383

MEREDITH, D. and TOMLINSON, J., Simultaneous Sensory Adaptation to Light 397

WEBSTER, I. A., The Dynamics of an Open Isothermal Homogeneous, Single Enzyme, Two Substrate System 417

BHAT, N. and PANDE, L. K., Three-Step Food Chains in Gompertz and Lotka–Volterra Models 429

SIMINOFF, R., Modelling of the Vertebrate Visual System 3. Topological Analysis of the Cone Mosaic 437

HUMPHRIES, R. L., A Computer Simulation of the Binding Between Flexible Ligands and Their Polymeric Receptor Binding Sites . 477

CHEUNG, A. S. and GRAY, B. F., The Sliding Filament Model of Muscle Contraction. III. Stability Analysis and Sinusoidal Perturbations 493

CHEUNG, A. S. and GRAY, B. F., The Sliding Filament Model of Muscle Contraction. IV. The Effect of Variation of ATP Concentration 507

THORNLEY, A. L. and HARINGTON, A., Diploidy and Sex as the Selective Advantages for Retaining Genes Transferred from Mitochondrial and Plastid Ancestors in the Nuclear Genome . 515

ERRATUM 525

Number 4, 21 August 1981

MANABE, T., Theory of Regulation by the Attenuation Mechanism: Stochastic Model for the Attenuation of the *Escherichia coli* Tryptophan Operon 527

BARBIERI, M., The Ribotype Theory on the Origin of Life . . 545

WILLIAMS, S. M., On the Applicability of Game Theory to Evolution: A Response 603

HERENDEEN, R. A., Energy Intensities in Ecological and Economic Systems 607

WAGNER, H.-J., The Minimum Number of Mutations in an Evolutionary Network 621

CHOU, K.-C. and LIU, W.-M., Graphical Rules for Non-Steady State Enzyme Kinetics 637

Index to Volume 91

Action potentials, membrane, in nerve and heart muscle, parameter estimation in Hodgkin–Huxley-type equations for, 321
Ageing, molecular basis for; non-specific reactions (letter), 233
Alkoxy amphetamines and brain serotonin receptors, possible interactions between (letter), 237
Alpha-helical protein molecule model, the exciton spectrum of, 1
Amphetamines, alkoxy, and brain serotonin receptors, possible interactions between (letter), 237
Antarctic soil No. 726 and implications for the Viking labeled release experiment, 41
ATP concentration, the effect of variation of, in the sliding filament model of muscle contraction, 507
Attenuation mechanism, theory of regulation by; stochastic model for the attenuation of the *Escherichia coli* tryptophan operon, 527

BARBIERI, M., The ribotype theory on the origin of life, 545
BARTOSZ, G., Non-specific reactions: molecular basis for ageing (letter), 233
BHAT, N. and PANDE, L. K., Three-step food chains in Gompertz and Lotka–Volterra models, 429
Binding between flexible ligands and their polymeric receptor binding sites, a computer simulation of, 477
BLANKEN, R. L. (see KLOTZ, L. C.), 261
Blood vessel growth, a continuum approach to; axisymmetric elastic structures, 273
BORCHARD, U. (see HAFNER, D.), 321
Brain serotonin receptors, possible interactions between alkoxy amphetamines and (letter), 237

Calcium entry in nerve terminals, a theoretical study of; with application to neurotransmitter release, 125
Cancer patients, energy kinetics and role of nutrition in, 303
CHARTON, M., Protein folding and the genetic code: an alternative quantitative model, 115
CHEUNG, A. S. and GRAY, B. F., The sliding filament model of muscle contraction. III. Stability analysis and sinusoidal perturbations, 493
CHEUNG, A. S. and GRAY, B. F., The sliding filament model of muscle contraction. IV. The effect of variation of ATP concentration, 507
CHOU, K.-C. and LIU, W.-M., Graphical rules for non-steady state enzyme kinetics, 637
Computer simulation of the binding between flexible ligands and their polymeric receptor binding sites, 477
Cone mosaic, topological analysis of; modelling of the vertebrate visual system 3, 437
Continuum approach to blood vessel growth: axisymmetric elastic structures, 273
Covariance and kinship, 191

CRAIG, A. G., A proposed modification to the microdosimetric theory of RBE, 47
Cross-linking interactions in systems of three reactants: theory pertaining to their experimental elucidation, 215
CUMMING, R. B. (see OLSON, W. H.), 383

DE WACHTER, R., The number of repeats expected in random nucleic acid sequences and found in genes, 71
Diploidy and sex as the selective advantages for retaining genes transferred from mitochondrial and plastid ancestors in the nuclear genome, 515
Dosimetry, Haber's rule and linear systems; chemical mutagens, 383
Double stranded nucleic acid molecules, some formal consequences of a specific association between; properties of multistranded structures, 33

EBEL, W. (see RUBINOV, S. I.), 99
Ecological and economic systems, energy intensities in, 607
Economic and ecological systems, energy intensities in, 607
Elastic structures, axisymmetric; a continuum approach to blood vessel growth, 273
Electrochemical potential difference, protonic, mitochondrial, as a point of hormone action; new proposals for the activity of glucagon, 171
Energy intensities in ecological and economic systems, 607
Energy kinetics and role of nutrition in cancer patients, 303
Enzyme kinetics, non-steady state, graphical rules for, 637
Enzyme (single) two substrate system, homogeneous, isothermal, open, the dynamics of, 417
Escherichia coli tryptophan operon, stochastic model for the attenuation of; theory of regulation by the attenuation mechanism, 527
Evolution, on the applicability of game theory to; a response, 603
Evolutionary network, the minimum number of mutations in, 621
Evolutionary trees, a practical method for calculation of, from sequence data, 261
Excitation processes, microscopical significance of the critical characteristics of stimuli in, as revealed by spectral analysis, 241
Exciton spectrum of the alpha-helical protein molecule model, 1

FEDYANIN, V. K. and YAKUSHEVICH, L. V., The exciton spectrom of the alphahelical protein molecule model, 1
Filament, sliding, model of muscle contraction. III. Stability analysis and sinusoidal perturbations, 493
Filament, sliding, model of muscle contraction. IV. The effect of variation of ATP concentration, 507
Folding, protein, and the genetic code: an alternative quantitative model, 115
Food chains, three-step, in Gompertz and Lotka–Volterra models, 429
FULDA, J. S., The logistic equation and population decline, 255

Game theory, on its applicability to evolution: a response, 603
Genes, overlapping, and information theory (letter), 379
Genes, overlapping, and information theory—a rebuttal (letter), 381
Genes, the number of repeats expected in random nucleic acid sequences and found in, 71

Genes transferred from mitochondrial and plastid ancestors in the nuclear genome, diploidy and sex as the selective advantages for retaining, 515
Genetic code, protein folding and; and alternative quantitative model, 115
Glucagon, new proposals for the activity of; the mitochondrial protonic electrochemical potential difference as a point of hormone action, 171
Gompertz and Lotka–Volterra models, three-step food chains in, 429
Graphical rules for non-steady state enzyme kinetics, 637
GRAY, B. F. (see CHEUNG, A. S.), 493, 507
Growth of blood vessels, a continuum approach to; axisymmetric elastic structures, 273
GUION, R. R., Possible interactions between alkoxy amphetamines and brain serototin receptors (letter), 237

Haber's rule, dosimetry and linear systems; chemical mutagens, 383
HAFNER, D., BORCHARD, U., RICHTER, O. and NEUGEBAUER, M., Parameter estimation in Hodgkin–Huxley-type equations for membrane action potentials in nerve and heart muscle, 321
HARINGTON, A. (see THORNLEY, A. L.), 515
Heart muscle, parameter estimation in Hodgkin–Huxley-type equations for membrane action potentials in nerve and, 321
HERENDEEN, R. A., Energy intensities in ecological and economic systems, 607
Hodgkin–Huxley-type equations for membrane action potentials in nerve and heart muscle, parameter estimation in, 321
Homology in protein sequences expressed by correlation coefficients, 347
Hormone action, the mitochondrial protonic electrochemical potential difference as a point of; new proposals for the activity of glucagon, 171
HUMPHRIES, R. L., A computer simulation of the binding between flexible ligands and their polymeric receptor binding sites, 477

Information theory, self organization origin of life scenarios and, 13
Information theory and overlapping genes (letter), 379
Information theory and overlapping genes—a rebuttal (letter), 381
Intestinal proliferon hypothesis, a critical assessment of, 63

JEFFREY, P. D. (see NICHOL, L. W.), 215
JEWELL, W. R. (see KRISHNAN, L.), 303

Kinship and covariance, 191
KLOTZ, L. C. and BLANKEN, R. L., A practical method for calculating evolutionary trees from sequence data, 261
KRISHNAN, E. C. (see KRISHNAN, L.), 303

LEVIN, G. V. and STRAAT, P. A., Antarctic soil No. 726 and implications for the Viking labeled release experiment, 41
Life (see Origin of life), 13, 545

Ligands, flexible, and their polymeric receptor binding sites, a computer simulation of the binding between, 477
Light, simultaneous sensory adaptation to, 397
LIU, W.-M. (see CHOU, K.-C.), 637
Logistics equation and population decline, 255
Lotka–Volterra and Gompertz models, three-step food chains in, 429

McGAVIN, S., Some formal consequences of a specific association between double stranded nucleic acid molecules—properties of multistranded structures, 33
MANABE, T., Theory of regulation by the attenuation mechanism: stochastic model for the attenuation of the *Escherichia coli* tryptophan operon, 527
MARTINEZ DEL RIO, C. (see SOBERON, J. M.), 363
Membrane action potentials in nerve and heart muscle, parameter estimation in Hodgkin–Huxley-type equations for, 321
Memory storage, the molecule-group schema of, 231
MEREDITH, D. and TOMLINSON, J., Simultaneous sensory adaptation to light, 397
Microdosimetric theory of RBE, a proposed modification to, 47
Microscopical significance of the critical characteristics of stimuli in excitation processes, as revealed by spectral analysis, 241
Mitochondrial and plastid ancestors in the nuclear genome, diploidy and sex as the selective advantages for retaining genes transferred from, 515
Mitochondrial protonic electrochemical potential difference as a point of hormone action; new proposals for the activity of glucagon, 171
Molecular basis for ageing; non-specific reactions (letter), 233
Molecule-group schema of memory storage, 231
Morphogenetic development in the slime mold, a mathematical framework for the study of, 99
Multistranded structures, properties of; some formal consequences of a specific association between double stranded molecules, 33
Muscle contraction, the sliding filament model of; the effect of variation of ATP concentration, 507
Muscle contraction, the sliding filament model of; stability analysis and sinusoidal perturbations, 493
Muscle, heart, parameter estimation in Hodgkin–Huxley-type equations for membrane action potentials in nerve and, 321
Mutagens, chemical: dosimetry, Haber's rule and linear systems, 383
Mutations in an evolutionary network, the minimum number of, 621

NEAL, J. V. and POTTEN, C. S., A critical assessment of the intestinal proliferon hypothesis, 63
Nerve and heart muscle, parameter estimation in Hodgkin–Huxley-type equations for membrane action potentials in, 321
Nerve terminals, a theoretical study of calcium entry in, with application to neurotransmitter release, 125
NEUGEBAUER, M. (see HAFNER, D.), 321
Neurotransmitter release, a theoretical study of calcium entry in nerve terminals, with application to, 125

NISHIKAWA, K. (see KUBOTA, Y.), 347
Non-specific reactions: molecular basis for ageing (letter), 233
Non-steady state enzyme kinetics, graphical rules for, 637
Nucleic acid molecules, double stranded, some formal consequences of a specific association between; properties of multistranded structures, 33
Nucleic acid sequences, random, the number of repeats expected in, and found in genes, 71
Nutrition, role of, and energy kinetics in cancer patients, 303

OLSON, W. H. and CUMMING, R. B., Chemical mutagens: dosimetry, Haber's rule and linear systems, 383
OOI, T. (see KUBOTA, Y.), 347
Open isothermal homogeneous, single enzyme, two substrate system, the dynamics of, 417
Origin of life, the ribotype theory on, 545
Origin of life scenarios, self organization, and information theory, 13

PANDE, L. K. (see BHAT, N.), 429
PARNAS, H. and SEGEL, L. A., A theoretical study of calcium entry in nerve terminals, with application to neurotransmitter release, 125
Plant–pollinator interaction, the dynamics of, 363
Plastid and mitochondrial ancestors in the nuclear genome, diploidy and sex as the selective advantages for retaining genes transferred from, 515
Pollinator–plant interaction, the dynamics of, 363
Population decline, the logistic equation and, 255
Potential difference, electrochemical, protonic, mitochondrial, as a point of hormone action; new proposals for the activity of glucagon, 171
POTTEN, C. S. (see NEAL, J. V.), 63
Proliferon, intestinal, hypothesis, a critical assessment of, 63
Protein folding and the genetic code: an alternative quantitative model, 115
Protein molecule model, alpha-helical, the exciton spectrum of, 1
Protein sequences, homology in, expressed by correlation coefficients, 347
Protonic electrochemical potential difference, mitochondrial, as a point of hormone action; new proposals for the activity of glucagon, 171

Random nucleic acid sequences, the number of repeats expected in, and found in, genes, 71
RBE, a proposed modification to the microdosimetric theory of, 47
Regulation by the attenuation mechanism, theory of; stochastic model for the attenuation of the *Escherichia coli* tryptophan operon, 527
Repeats, the number expected in random nucleic acid sequences and found in genes, 71
Ribotype theory on the origin of life, 545
